## Position – US Platform Delivery Manager

### Company Profile

Fexillon are the leading specialists in managing digital information for the whole asset lifecycle. The company manage quality approved information on projects for blue chip clients, across numerous sectors, including the pharmaceutical, data centre, healthcare, educational and architectural industries. Fexillon is an award winning company with over 20 years in business. The company is expanding globally and to facilitate this expansion, require a US Platform Delivery Manager to work as an integral part of the Senior Management team.

### Company Culture

Organisational culture is a pattern of shared values and beliefs, giving members of the organisation meaning. Fexillon has a unitarist and collaborative culture, where the company and its teams share the same goals and objectives. Our people maximise their potential through company leadership and learning models.

Development of people is a key element of a leadership organisation. The Company Directors create a shared vision, inspiring all the team to believe in what they can become, as well as encouraging them to participate in the formulation of company strategy. This provides people with a platform for innovation and creativity.

A learning organisation continually transforms and promotes the learning of all its members. The Company believes in transferring knowledge quickly and efficiently throughout the organisation. Each employee has an individual education, training & development programme. Employees are participants not observers,

Fexillon is a collective powered by diversity and inclusion. It is a demanding family like business environment. The Company places a significant emphasis on sustainability, social responsibility and assisting community initiatives.

### Company HR Mission

*Empowering people to maximise their professional and personal potential in a challenging business environment.*

### Role Profile – US Platform Delivery Manager

As a key component of the senior management team, the Platform Delivery Manager will report to the Directors, as well as contributing to the strategic planning and decision making of the business. The role will be primarily responsible, for implementing BIM and information delivery and associated digital construction procedures as well as Digital Twin for the whole asset lifecycle. The platform delivery manager will be the interface between designers, clients, contractors, and the supply chain.

The US Platform Delivery Manager will implement a medium-term BIM strategy, focusing on the Fexillon Platform Functionality, Use Cases, workflows, and product roadmap and aligned international BIM standards to include quarterly targets.

The role is based in Charleston, South Carolina.

---

## Key Role Responsibilities

- Contribute to the Formulation and Implementation the Company's BIM strategy and Digital information plans.
- Produce monthly reports for the Senior Management team, to identify and measure platform implementation and BIM delivery across customer sites.
- Lead BIM team meetings, identifying project tasks and co-ordinating issue resolution on Fexillon customer sites.
- Monitor advances in AEC and building related technologies.
- Raise the profile of Building Information Modelling within the Company.
- Contribute to the Fexillon Information Management strategy through the development of partner integrations on the platform i.e., XBIM, GS1 etc.
- Manage Customer Sites / publishing Building Information models from integrated Fexillon REVIT Plugin to the Fexillon Platform including Asset Information and views / schedules and asset information contained in design, construction, and as-built federated models.
- Develop documentation to support training members and end-users (BIM Managers) on the Fexillon platform to publish models to the Fexillon platform at the required stages of the Digital Plan of Work and to the required standard as set-out in the Contract Admin specification and the BEP / EIR
- Contribute to product roadmap definition in all areas relating to BIM co-ordination and management on the Fexillon platform and partner integrations including the customisation of POWER BI to visualise and report compliance with Owners Contract administration and BIM related specifications.
- Advise owners and assist with the Definition and monitoring and application of Asset ID's and tagging in BIM models utilising the GS1 standard.
- Manage workflows from BIM to Digital Twin utilising Fexillon Technology pathway to Azure Digital Twins and enabling effective visualisation of Assets for monitoring in the Fexillon Twin environment.
- Define resource and organisation plans to align with the BIM strategy.
- Participate in presales activities and presentation as well as representing the company at conferences, trade shows and speaking on the BIM process.
- On-boarding and training new hires in support of Customers & Projects
- Champion customer success and contribute to developing Standards for implementation and on-boarding and support of existing and new customers on the Fexillon Platform.
- Train and upskill colleagues in specific software programmes.
- Contributing to Use Case development in the BIM management and Digital Twin deployment on the Fexillon Platform
- Work closely with customer facing teams to comprehend and meet customer needs.

## Skills, Qualifications & Competencies
